**Dr. Anshuman Kohli** is an Associate Professor at the Department of Soil Science and Agricultural Chemistry, Bihar Agricultural University, Sabour, Bhagalpur, Bihar, India. He holds a Ph.D. in Soil Science from the Punjab Agricultural University, Ludhiana, India (2002). He is actively involved in teaching undergraduate and post graduate students. He has been teaching the post graduate courses on soil physics and soil erosion and conservation since last 10 years. His research and extension activities revolve around participatory research on rainfed cropping systems, rainwater harvesting, indigenous technical knowledge, soil physical quality, water management and precision nutrient management under rainfed environments. His current areas of interest include elucidating the effects of management practices on water and nutrient balance and carbon dynamics in rainfed environments and the drivers of livelihood for resource poor farmers in constrained ecologies. He has authored over 20 peer reviewed research articles and organized several scientific and extension events.
